

Username Converter Application using Flask

Step 1:

The screenshot shows a web browser window with the address bar displaying 'http://127.0.0.1:5000 / Username Converter Application'. The browser tabs include 'README.md', 'Username Converter Application', and 'app.py 1'. The main content area features a white card with the title 'Username Converter Application' and a rocket icon. Below the title is a text input field with the placeholder 'Enter your name'. A blue button labeled 'Generate Report' with a document icon is positioned below the input field.

Step 2: Enter the username as: **mrudula306**

This screenshot shows the same web browser window as the previous one, but the text input field now contains the username 'mrudula306'. The 'Generate Report' button remains visible below the input field.

Result:

The screenshot shows a web browser window with two tabs: 'app.py 1' and 'Report X'. The address bar displays the URL 'http://127.0.0.1:5000/?name=mrudula306 / Report'. The main content area has a teal background and features three white panels. The first panel displays a greeting: 'Good Afternoon 🌤️ , mrudula306..... 🍌'. The second panel, titled '✨ Transformations ✨', contains a table of name variations. The third panel, titled '📊 Statistics', contains a table of name metrics. At the bottom, there is a green button labeled 'Try Another Username' and a message 'You're amazing! 🌟'.
